Comments? (If no comments, please type No comments)	Mr. Duncan has room for improvement. I am evaluating the class two weeks until the final and his class is currently averaging 68 on the exams (3rd test) these numbers were updated, which are failing. He needs to do more hand on activities or engaging activities instead of reading directly from the powerpoints.

Text response questions	Answers	
Comments? (If no comments, please type No comments)	My grades in this class have been and still are fairly inaccurate, even after talking to the professor. The professor also provides assignments that are essentially useless in regards to the material taught in class. I have had to teach myself through this class because the tests and assignments do not correlate with the lecture material. I have felt on multiple occasions that the professor puts himself and his graduate work before our class, which explains why myself and a majority of my classmates hardly know what is going on in class anymore.

Comments? (If no comments, please type No comments)	As the semester went on, definitely became more comfortable teaching. I really appreciated the Fridays when we would be given problems to apply what we learned throughout the week on, it really helped cement my knowledge and understand what I knew and misunderstood from earlier.
